Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to an apparatus for identifying an unknown DNA sample; and claims 8-17, drawn to a biosensor cell for identifying an unknown DNA sample, classified in class 307, subclass 109.
 - II. Claims 18-21, drawn to a method for identifying an unknown DNA, classified in class 436, subclass 94.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus of claim 1 can be used in a materially different process such as the analysis of any other ligand as no DNA is required to be present.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Michael Fogarty, Reg. No. 36,139, on 21 July 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1634
